Good Morning,

I just received a call from Faustino Lopez from No More Deaths, he reported a C900 in July reference

OCA# 180726178. Smith went to recover the remains and was unsuccessful so Sheriff 1 was sent instead. The report shows they recovered several bones and other items, surveyed the area and found nothing else.

Faustino Lopez went out to the site two days ago and said there is still a vertebrae and an arm bone, which he put a circle of rocks around this time so they would be easier to spot. This is the second time that he has gone back to a site and found that there are still remains. He has offered each time to go out with the deputy to recover the remains if needed.

Faustino Lopez
